

AHMED SOBHY

IT & Networking Student | Full-Stack Web Development Enthusiast

Information Technology student specializing in network engineering, with hands-on full-stack web development experience across React/Next.js and Node/NestJS. Comfortable bridging infrastructure and software architecture, from CCNA-level networking fundamentals to building and shipping deployed, production-style web applications.

EXPERIENCE

BugsBunny — Cybersecurity & Hardware-Integrated Security System

Second Year Graduation Project | Supervised by Dr. Radwa Radi, IT Department

- Engineered a Raspberry Pi hardware bridge connecting embedded sensors to a Windows-based control environment for real-time data exchange.
- Integrated the hardware layer with AI-driven detection models to simulate network attacks and identify vulnerabilities across the system.
- Collaborated within a multi-disciplinary team spanning AI, Cybersecurity, Network Engineering, Embedded Systems, and Software Development.

MediTrust

meditrust.great-site.net | PHP, SQL, Tailwind CSS

- Developed the MediTrust expert system and its admin dashboard using PHP, SQL, and Tailwind CSS, applying rule-based logic to recommend drug excipients.
- Built an interactive 3D model viewer for excipient visualization and integrated QR code scanning for quick product lookup.

Dynamic QR Code Generator

dynamic-qr-gen-zeta.vercel.app | Next.js, Tailwind CSS, qr-code-styling

- Built and deployed a QR code generator supporting Links, Wi-Fi, Email, and vCard content types, with live debounced preview and pattern/style customization.
- Added custom branding controls (named color presets, custom picker, WCAG contrast warnings, logo upload) and PNG/SVG export with a local generation history.

The Ledger

Personal project | HTML, CSS, JavaScript, Chart.js

- Built a bilingual (English/Arabic, full RTL support) small-business transactions dashboard with no build step, using Chart.js and PapaParse.
- Implemented CSV import with flexible column mapping, KPI cards with period-over-period deltas, four analytics charts, filtering, and CSV export/templates.

Produce Delivery Platform

Personal project — Alexandria, Egypt | React, Vite, TypeScript, NestJS, PostgreSQL, Prisma

- Designing and building a produce/vegetable delivery website affiliated with a single Alexandria store, from MVP through a full feature roadmap.
- React/Vite/TypeScript frontend backed by a Node.js/NestJS API with PostgreSQL and Prisma.

Smart Study Planner

Personal project | PostgreSQL, Prisma, pnpm monorepo

- Designed a full-stack study scheduling app with a 23-endpoint REST API and a three-phase scheduling algorithm combining weighted priority scoring, SM-2 spaced repetition, and greedy slot assignment.

Additional Projects

Next.js, React, Tailwind CSS, Three.js

- Event Web Application — interactive event site with a live countdown timer, location mapping, and a personalized guest check-in flow (event scheduled May 2027).
- Personal Portfolio (ahmedsobhy28.github.io/portfolio) — cyberpunk/terminal-themed site with a Three.js background globe, showcasing projects, certifications, and an ideas backlog.
- Weather Advanced Application and a Student Management System, built as full-stack web tools.

SKILLS

Networking & Security

Subnetting, routing/switching fundamentals, Linux administration, Cisco networking concepts, vulnerability simulation basics.

Web Development

React, Next.js, Node.js, NestJS, REST APIs, Tailwind CSS, Vite.

Programming Languages

JavaScript/TypeScript, Java, C, C++, Python, SQL.

Databases & Tooling

MySQL, PostgreSQL, Prisma, Git/GitHub, Docker.

Hardware & Other Tools

Raspberry Pi integration, Three.js, VS Code, Notion (task/project scheduling).

Soft Skills

Agile team collaboration, cross-disciplinary project work, problem solving under academic supervision.

EDUCATION

B.Sc. Information Technology — Networking Specialization

Borg El Arab Technological University | 2027

- Relevant coursework: Computer Networks, CCNA (Network Engineering), Web Development, Object-Oriented Programming (Java), Database Management, Data Structures.
- Completed intensive academic bootcamps in network topologies, core computer science fundamentals, and software architecture.

CERTIFICATIONS & TRAINING

- CCNA — Cisco / Jeremy's IT Lab (In Progress)
- CompTIA Network+ (In Progress)
- Cisco Networking Academy — Core Networking & Subnetting
- Cybersecurity Specialist Program — InfoSec4TC
- Professional Leadership & Core Skills — McKinsey Forward
